

Ganvié Village Houses

Materials:

- Milk carton
- Craft sticks
- Glue
- Cardboard
- Aluminum foil and/or dried grass or straw
- Brown construction paper

Directions:

- Cut the top off of the milk carton. Cut four slits in the bottom of the carton, large enough to insert the craft sticks. Push the sticks into the slits to form stilts. Try to keep the house balanced.
- Cut a piece of brown construction paper to cover the outside of the milk carton. Glue the paper to the carton and then glue the prayer requests to the sides of the carton.
- Cut cardboard to form a flat roof and lay around the milk carton. Cover the roof with aluminum foil to make a tin roof, or glue dried grass or straw on the roof to make a straw roof.
